President's Policy Is Not Yet Made Public But He Accepts Ambassador's Resignation

MINNESOTA MAN IS CHOSEN

Former Governor Lind Is Sent to Mexico as the President's Personal Representative and Not as an Ambassador

U. S. MUNITIONS OF WAR TO BE DENIED

WASHINGTON, Aug. 4.—President Wilson today took the first steps in the policy through which he proposes to deal with the Mexican situation. He formally accepted the resignation of Ambassador Henry Lane Wilson to take effect on October 14, and sent to Mexico City as his personal representative—but not accredited to the Huerta government, former Governor John Lind of Minnesota, a life-long friend of Secretary Bryan. The understanding is that when a stable government is established in Mexico Mr. Lind will be formally named as ambassador.

President Wilson and Secretary Bryan had frequent conferences during the day; Ambassador Wilson had a long talk with Mr. Bryan and Chairman Bacon of the senate foreign relations committee discussed the situation with the president at the white house. But except for the announcement of Mr. Lind's mis. sion, no explanation of the policy to be pursued by the American govment was forthcoming. The statement from Secretary Bryan read.

Bryan's Statement.

"Ex-Governor John Lind of Minnesota has been sent to Mexico as the personal representative of the president to act as advisor to the embassy in the present situation. When the president is ready to communicate with the Mexican authorities as to the restoration of peace he will make public his views.

State Charge of Blackmail Originally Preferred Is Believed to Have Been Dropped and the Federal Government Will Now Seek to Determine Whether or Not a Bribe Was Solicited.

NEW ORLEANS, La., Aug. 4 .-The release from prison without bail today of J. L. Mott, secret agent of the department of justice and Ernesto Fernandez, representative of the constitutionalist party of Mexico is interpreted to mean that there will be no prosecution in connection with the payment last week of \$500 by Emmanuel Castillo Brito, former provisional governor of Campeche, Mexico on an alleged promise of immunity from criminal charges prepreferred by the Mexican government. G. Raymond Mathews, special agent of the department of justice who accepted the \$500 from Brito and who asserted that it was done in connection with a plan to detain Brito until a warrant for his arrest should arrive from Washington, was released Saturday.

The release of Mott and Fernandez followed an investigation made by a special representative of the department of justice who arrived here Saturday night. May Mean Transfer of Case. Washington, Aug. 4.-The release from custody at New Orleans of the

CALUMET, Mich., Aug. 4 .- At empts were made to day to solit interests of striking copper miners by organizing local unions independently of the Western Federation of Min ers. A meeting that crowded the Red Jacket town hall, broke up in dis order when Janco Tersch of the fed eration's executive board ordered all union men to leave. A misunder standing caused a battalion of troops to be sent to the place, but the crowd had dispersed when the militiamen arrived. Before the sudden ending of the session an organization committee was selected which is to continue the work tomorrow

Another meeting at Painsdale, sent a committee to General Manager Denton of the Copper Range Consolidated company, demanding higher wages as a price for returning to This offer of men supposed to be willing to help break the federation's strike elicited a refusal from the company. Many of the men then announced their intention of leaving the copper mining field.

Several companies called for miners and trammers to re-enter the shafts to day but so few responded that none of the mines tried to operate. This development resulted in an immediate report that strike breakers were to be sent into the workings tomorrow and predictions of trouble followed.

WATSON DECLINES TO APPEAR

WASHINGTON, Aug. 4 .- Investigation of the activities of Martin M. Mulhall for the National Association of Manufacturers will occupy the attention of committees on both sides of the capitol for the first time since the "lobbylst" made his startling charges a month ago. The house investigating committee will begin its work with the examination of Louis Seibold of the New York World, who had much to do with turning over the letters that newspaper had of the Mulhall correspondence. The senate will, tomorrow, hear former Senator Joseph B. Foraker, of Ohio, mentioned by Mulhall as one of the men he used to know well in Washington and as one of those for whom he did campaign work. The committee received more letters from Mulhall today which the lobbyist said proved some of the statements he made in his direct testimony. Senator Townsend today denied he had held confidential conversations with Mulhalf in his office when he was a member of the house. He declared such statements to be absolutely false. Chairman Overman read a letter from former Representative James

E. Watson of Indiana, mentioned frequently by Mulhall as his friend and ally in work here, in which Watson declined to appear before the committee. Watson based his declination on the newspaper interviews and said he expected to appear in another court where the jury would not begin the case until all the evidence was in. Watson wrote tonight to Chairman Garret asking conclusion of Mulhall's testimony.

Mr. Wells was of the opinion that certain changes could be made in \$5000 For Repairs-Schools Will the proposed building which would get the cost down and at the same time not injure the building greatly. He thought it would be a waste of money to throw aside the present plans.

Mr. Rogerson believed it would cost just as much to revise the plans as it would to get new plans for a smaller and plainer building. Mr. Buckingham said that which ever he was ordered to do, that he would be willing to charge only for the absolute cost of the work.

Mr. Bavington said he agreed with Mr. Wells and that it would be foolishness to throw away the plans which the board had been working on for three years.

Mr. Wells presented the follow completed building, including light, ing list of items which he said could heat and plumbing does not exceed be changed in the proposed build-\$75,000. Two Buildings Proposed. The plans or sketches which Mr. Buckingham produced for the buildings which Mr. Rogerson advocated called for two separate buildings on the lot, one for school purposes and the other for a gymnasium and Mr. Rogerson said they both could be erected at a cost of about \$62,000 At this point Mr. Rogerson and Mr. Bavington engaged in a wordy dispute about the relative value of casting aside the old plans or changing them. Mr. Rogerson and Mr. Wells also had a little sharp debate in which the former said that he was advocating a lower cost build-

Mr. Hall said that the old plans called for nineteen new school rooms and that as the total number of pupils in the eighth grade is 154 he the number of pupils in the schools is considerably smaller now than was true ten years ago, as a total, although there has been some increase in attendance in the eighth grade and high school.

ing because the people approve such

President Davis said that no one had made objections to him about the erection of a building as originally planned, that the board had for ten years been levying \$20,000 for building purposes and that he had heard no complaints except from a few kickers who did not want to pay taxes.

Mr. Hall said he would have no objection to submitting the question of erecting a building such as had been projected, to a vote of the people on the issuance of bonds. The president said he had reached a point where he didn't care whether or not the building was erected.

Will Revise Plans. Mr. Hall had doubted the feasibility of trying to use the old plans as the cost price would have to be so materially reduced. After hearing the suggestions made by Mr. Wells and hearing from the architect, however, Mr. Hall made a motion that the architect be requested to reduce the dimensions of the proposed building and to so change the interior that complete with light. heat and plumbing the estimate cost shall not be more than \$75,000. Mr. Bavington offered a second to this

Mr. Rogerson thought it would be better ot start over, but if the architect was ready to reduce the plans as suggested and felt that this was Buckingham had some new sketches practical and feasible he was willing to vote for it. So the motion was put and carried unanimously. Then the tax levy ordinance was put up and on motion of Mr. Bavington, with a second by Mr. Rogerson, was carried.

Mr. Wells made a motion that the board appoint Mr. Collins of Chieago high school principal at a salary of \$1,800 per year, but he subsequently withdrew this motion after the suggestion by Mr. Rogerson that the matter should be postponed for ten days until more applications

On motion of Mr. Hall, with a second by Mr. Wells, Monday, September 8 was fixed as the opening date for the coming school term. It was decided that the members of the board will meet Saturday aftermoon and visit the several school buildings to determine what repairs are most needed. Adjournment fol-

"MARY STUART"

Adapted from the Drama by Frederick Schiller.

In all history there is no more pathetic figure than beautiful Mary Stuart, the lovely Queen of France and Scotland, whom fate seems to have marked from childhood as a victim of its cruelty. Her hopeless struggle, in the relentless power of the great Queen Elizabeth, the plots and intrigues of the followers of both queens, form one of the most romantic and exciting series of incidents outside of fiction.

Romance itself could not rival this brief glance into history which has been offered only after the most painstaking study of the costumes, manners and settings of the Elizabethan period. Accurate in every detail, photographically superb, acted by one of the strongest casts ever assembled in one photoplay, this production is worthy to rank with the few really great films of the year.

SOME OFF-SIDE CHUTES

Sunday's "bull-pup" editions of

metropolitan press contained four line notices of the burial of the oldtime king of the pool box and the first man in the United States to introduce the pari-mutuels, the French system of speculating on the races-Hard, for a Total of Twelve Hits Silver Bill Riley. Colonel Riley was -Cutshaw Secures Two Home in life the best known and the best liked auction pool expert who ever handled a speculator's dollar in this Chicago, Aug. 4.—Brooklyn defeated Chicago 7 to 1 to day by bunching hits off Moore and Pierce. Allen was on the mound for the was on this side, for the grandiloglobe. For years in the old Board of Trade alley in Chicago his pool room was the rendezvous of all the big racing speculators of this counary and Canada. He would make pool upon any and everything his patrons suggested, and in 1880, when General Garfield was made the Republican nominee for president, Governor Pinchback, who was a delegate to the convention, and a coal black negro, also an ardent supporter of General Grant, was in Riley's pool room. The governor had played a horse named Northern Lights against the field in the pool and had won When he went up to cash his ticket, Riley lamped the General Grant badge upon Pinchback's coat. In his usual suave manner he addressed the crowd of bettors lined up in front of him: "Gentlemen, what will you give for a dark horse against the field holding forth in the Exposition building?" In a flash Pinchback "Mistah pool man, ah's got \$2,000 on General Grant 'ginst any General Grant's famous "329" at that moment looked like a cinch, and the bettors did not want any part of the Pinchback money, until one Norrie Bluhm, the apple and peanut boy, piped: "I will take \$5 worth of the dark horse, Colonel.' That started the game and the Pinchback General Grant pool was run up to \$6,805, which Norrie and his dark horse captured on a \$5 shoestring. Bill Riley was at one time credited with being a wealthy man, but this was a mistake. The Colonel had no opportunity to become rich. When the Creator constructed old Bill he planted in his breast a heart that forbid the hoarding of money; his hand was forever diving into his pocket, alleviating some suffering widow and orphans, in dispensing sweet charity among the worthy needy and in reclaiming the down-and-outers. Old Bill has gone to a happier life, and that his soul will eternally rest

Corn Climbs as High as 71%c Although Last Week 70c Was Regarded as Impossible-Government Forecasts at Least Seven Days More of Dry Weather.

(By Associated Press) Chicago, Aug. 4.—Corn buying took such gigantic proportions today that the market became dangerous for holders. Merely the mention of a sprinkle of rain in Iowa brought on a selling stampede that rattled prices down two cents a bushel, more than wiping out all the gain made previously during the day. The close was nervous at the same as Saturday night to 4c up. Latest trading left wheat at a net decline of %@ 1/2@ 1/5c, oats off 1/4@ 1/4 to 1/4c and provisions showing a break of

7% to 52%c. Accompanied by the most excited transactions of the year corn climbed as high as 71%c, although last week 70c was regarded as a nearly impossible goal. The government forecast of at least seven days mire of dry weather was largely responsible for the continued advance this morning. Topmost figures reached today were ten cents a bushel above where the market stood ten days ago before alarm as to crop damage from drought had begun to be acute. Leaders who have watched pit operations declared tonight that a number of largest holders had sold

out on today's bulge. The fact that no hot wave is in sight led some of the more conservative owners to believe that the buying and advance had been too feverish and heavy profit taken under way when news of the Iowa showers turned a decline into a smash. Only the knowledge that two-thirds of the corn fields of the United States were reported as showing irreparable damage or as being over the danger line saved the mar-

ket from a cent loss for the day. In wheat as in corn there was a collapse of prices after mid-day. The break in corn had much to do with causing general selling of wheat on

EAGLES ANNEX SUNDAY SWATFEST FARMERS VARY IN VIEWS FROM VISITING CURRAN BLUES

Visiting Team Made Up of First Baseman, a Battery and Six

It was bing, bang, boom, with the Eagles at the long end of the fireworks in the festivities against a "team" from Curran Sunday afternoon at Nichols park diamond. There is no chance for calling the affair a baseball game nor a contest. The Journal's defense fund in bank provided for against possible libel suits would not be strong enough to furn. ish the necessary bonds for appearance in court if this paper were to dub it a game. Every one of the 600 fans who turned out Sunday would have just cause for action against the paper. It was a walkaway for the home talent, and after the first round the final outcome never was in doubt.

sary upon the part of the Eagles was one of the three gardens and the slam was invariably good for from one to three corners.

To be frank about the visitors they were made up of a combination of strapping youngsters who daily engaged in hard work for a livelihood, and batting the ball was the only lookin they had as even near ball players, with the exception of the first baseman, the pitcher and the catcher. The balance of the team on the field was made up of at all times. The youngster on first er, cool as a Scott county cantaloupe and gentlemanly with it all. The oox score shows the pitcher in anyhim that affair would have been reversed by a large margin.

Harry Norris was wised up to a new angle in baseball. The batter pops a measly fly into the left fielder's mitts; the sphere sieves through and dashes between his legs, and the batter gets a two base hit—ask Harry how it happened.

The White Sox will be compelled to await an opportunity to meet the Eagles. Report has the latter engaged for several weeks to come. One fact shows plainly in the summary following the score. When his mates fell down on him on fly balls to the field, pitcher Maurrer resorted o the whiff to kill the locals. Fourteen of them were shot dead on three good ones.

Egan was the slugging fiend of the day. Two of his blows were for three sacks, and if he could have recovered nimself going around the sacks, both plows would have been easy homers. F. Poor, first sacker for Curran, certainly had the crowd with him, and deservedly so. His whole heart was in the game—afield and at'bat. It was a pleasure to watch J. Maurrer backstop. NEW CONTROLLER FOR CARS. W. B. Miser, superintendent of the Jacksonville Railway company, is watching with interest results from a new controller which is being used on one of the street cars now in service. The controller is known as the auto-motoneer type and is a recent invention. The special advantage claimed for it is that the motorman cannot throw on more current than the motor will stand and its use should mean economy in current and in longer life for the motors. If the controller now in use seems to mee: the claims that are made for it, the other cars will probably be equipped with them.

The body contains phosphorus sufficient to make 483,000 matches. Phosphorus is one of fourteen elements composing the body-divided among bones, flesh, nervous system and other organs. The perfect health of body requires a perfect balance of the elements. These elements come from the food we eat—the stomach extracts and distributes them.

But if stomach is deranged-the balance of health is destroyed and the blood does not carry the proper elements to the different organs, and there is blood trouble—nerve trouble—heart trouble. Pain is the hungry cry of starved organs. Put the liver, stomach and organs of digestion and nutrition into a condition of health. That is just what is done by

DESTROYED BY FIRE

Building on Farm of James McNeely, South of Franklin Consumed at Loss of \$1,800-8 Hogs Burned

The large cattle and hog barn, on the farm of James McNeely, 8 miles south of Franklin, was totally destroyed by fire Sunday night, entailing a loss of \$1,800. Mr. McNeely had left a lighted lantern in the hallway of the barn and it is supposed that the hogs gained access to that part of the building and rooted the lantern over.

Shortly before 9 o'clock Mr. Mc-Neely had gone to the barn to see after his stock and left the lantern in the hallway. It was not more than five or ten minutes before he! returned to find fire issuing from the barn and he summoned aid and began to get the stock out of the structure. The fire gained such headway that the bucket brigade lent their efforts in saving the main barn which is situated between the cattle shed and the house.

Aside from grain, hay and quantity of lumber, 8 head of hogs were burned and Mr. McNeely estimates his loss at \$1,800. The barn was built last fall and was a substantial building. There was some insurance and the owner expects to replace the building this fall. .
